## Activities

In high school, I challenged myself to help the community and work in clubs to expand my knowledge. The longest and most active club I was accountable for was Key Club. A wide-known organization that allowed me to help my local community with such activities as cleaning up public areas, contributing to companies to provide food for the malnourished, and helping create gifts and items during the holidays for those less unfortunate. Some other clubs and organizations I have been with include the Racial Alliance Collaborative Effort Organization, Band, ACT/SAT Club, and Workout Club. Alongside all the clubs, I also decided to do an internship. I started working with Amanda Byers (The President of the Dayton Chamber of Commerce) to receive hands-on experience with the business side of the world. Some experiences during this internship included being part of the board for the city of Dayton, alongside events such as ribbon-cuttings, press conferences, and community events.

## Job Experience

Some of my job experience has included internships, working jobs in retail, and leadership jobs at The Ohio State University. I started working with Amanda Byers (The President of the Dayton Chamber of Commerce) to receive hands-on experience with the business side of the world. Some experiences during this internship included being part of the board for the city of Dayton, alongside events such as ribbon-cuttings, press conferences, and community events. Next, I went to Buckle at the Fairfield Commons Mall in Beavercreek, OH, to better understand the sales part of business and understand the customer's perspective. Not only did this job give me a great idea for a business but gave me leadership and collaboration experience when working with people. Up until now, I have been working with the admissions team at The Ohio State University to provide a better experience for upcoming students. I give campus tours, help set up events, and be a part of moments, such as photoshoots for the campus page. This opportunity has also given me the opportunity to work alongside the professional work environment of the staff at Ohio State.

## Personal Details

## My Objective

I am a challenge-seeking student that wants to pursue my passion for a business of my own regarding computer science, computer hardware, or cyber security. As I continue my education at The Ohio State University, I hope to acquire my bachelor's in Computer Science to help me achieve this goal.

## Interests and Hobbies

Hobbies have been something I can inspire myself, as it drives my passion for creativity and exploration. One thing I love to do in my free time is play instruments. Music has always been a passion of mine, so I decided to learn how to play the piano when I was five years old and continued to find the guitar and flute fun to play. I also find the science of space and weather interesting, and I tend to draw when bored or distracted.
